SteuerhinterziehungsbekÃ¤mpfungsgesetz

I'm not making this up. And now I probably have to fix my menu to wrap it in a sane way...

Update: I copy–pasted it from the Bundestag site, but after playing with `perl -MTeX::Hyphen -le 'print TeX::Hyphen->new(style => "german")->visualize(shift)' SteuerhinterziehungsbekÃ¤mfpungsgesetz` I noticed it's not spelled correctly there either the first time: It's SteuerhinterziehungsbekÃ¤mpfungsgesetz. Don't blame germans for not knowing how to spell Kampf.
