Wake up and smell the flowers

Thursday 2 July 2009 00:24

This is what my downstairs neighbours' balcony looks like in the morning. With the weather being SchwÃ¼l I have to open all the windows to try to keep the noise of the cooling fans of the Playstation 3 down when playing GTA, and then in the evening the nice smell of those flowers streams in. The street sounds get a bit more surround as well, but the sound of the engine of the 911 across the street is unmatched by anything in GTA.

And the summer feeling isn't complete without the constant beeping of a server that is running a little hot.
