> Can I download the AmpliFeeder source code so I can compile or modify it myself?
>
> Not right now, but check back in a couple of weeks and it will be available.

Blog: most recent post 2nd May 2009. "The full source code for the application is not yet available as I am trying to get a few more user install and experience stories so I can confirm I’ve got all bugs worked out."

And by a few more I mean just the very first user install, probably. Ironic piece of roadkill.
