Fake Tilt Shift

Wednesday 14 January 2009 03:21

Via via I learned some graphic trick with the highest impressive−result/hard−to−do ratio I've experience so far. The hardest part is finding some good images to use, then it's easy as pie using Gimp. Of the almost 4000 images I screened these were the results:

[IMAGE]

[IMAGE]

[IMAGE]

The last one was easy because the original image already looked like it was of a miniature.
